Education

Vellore Institute of Technology

M.Tech Integrated Software Engineering

August 2022 – June 2027

CGPA: 8.49

Islamiah Higher Secondary School

Higher Secondary Education

August 2020 – May 2022

Aggregate: 88.5%

Experience

Software Engineer Intern | Statentics

June 2025 – August 2025

- Developed backend software modules using JavaScript, Node.js, and MongoDB while collaborating with senior engineers in Agile sprint cycles.
- Designed and integrated RESTful APIs, implemented business logic, participated in code reviews, unit testing, debugging, and feature enhancements.
- Optimized database queries and API workflows, reducing average response time by 25% while improving application reliability and maintainability.

Projects

FamCare | Healthcare Web Platform | Java, Spring Boot, PostgreSQL | [GitHub](#)

Dec 2025 – Feb 2026

- Developed a healthcare management system using Java, Spring Boot, and PostgreSQL following layered software architecture principles.
- Designed RESTful APIs with JWT authentication and role-based access control (RBAC) for secure access to healthcare records.
- Optimized relational database design for appointments, prescriptions, and patient management while ensuring scalability and data integrity.

Speedzy App | React Native, Node.js, MongoDB, AWS EC2 | speedzy.shop

Dec 2024 – Present

- Developed RESTful backend services using Node.js and MongoDB for order processing, authentication, and delivery management.
- Implemented real-time communication using WebSockets for live order tracking and synchronized application state across clients.
- Deployed and maintained scalable backend services on AWS EC2 while improving reliability, performance, and system availability.

HR Workflow Designer Platform | ReactJS, TypeScript, React Flow, Node.js | [GitHub](#)

Apr 2026 – May 2026

- Engineered a workflow management platform using React, TypeScript, and Node.js with modular software architecture.
- Implemented asynchronous API integration, reusable UI components, and efficient state management using React and TypeScript.
- Applied software engineering principles including component-based development, custom hooks, and maintainable code.

Technical Skills

Languages:	Java, Python, C++, JavaScript, TypeScript, SQL
Core CS:	Object-Oriented Programming (OOP), Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management Systems
Software Engineering:	REST APIs, Object-Oriented Design, Agile Development, Unit Testing, Debugging
Frameworks:	Spring Boot, React.js, Node.js, Express.js, Flask, Django
Databases:	PostgreSQL, MongoDB, Firebase
Cloud & Tools:	AWS EC2, Azure, Git, Docker, Linux

Achievements & Certifications

- Winner - 1st Place:** BitNBuild'24 Tamil Nadu Regional Round, Google DSC [\[Link\]](#).
- National Finalist:** BitNBuild'24 Hackathon, Mumbai [\[Link\]](#).
- Top 3 Finalist:** Neural Nexus'24 AI/ML Hackathon, Vijaybhoomi University [\[Link\]](#).
- IBM Skills Network:** SQL and Relational Databases 101, Cognitive Class [\[Link\]](#).
- EY Techathon 5.0:** Advanced through Initial Screening Round, EY [\[Link\]](#).

Extracurricular

Senior Core Member | ADGVit

October 2024 – May 2026

- Conducted technical workshops on programming, software engineering, and problem-solving for student developers.
- Mentored junior members on software development best practices, collaborative project development, debugging, and version control using Git.
