

AI Workflow Builder - Knowledge Base Test Document

This document is for testing the RAG pipeline in the AI Workflow Builder application.

Company: TechCorp AI Solutions

Founded: 2024

CEO: Alex Johnson

Product: AI Workflow Builder

Key Features:

- Visual drag-and-drop workflow builder
- Knowledge base integration with PDF upload
- Real-time streaming chat via SSE
- Gemini 2.5 Flash LLM for generation
- ChromaDB vector database for semantic search

Pricing:

- Starter Plan: \$29/month (5 workflows)
- Pro Plan: \$99/month (unlimited workflows)
- Enterprise Plan: Custom pricing

The platform supports four node types:

1. User Query - captures user input
2. Knowledge Base - retrieves relevant context from uploaded documents
3. LLM Engine - generates responses using Gemini
4. Output - formats and returns the final answer

Technical Stack:

- Backend: FastAPI + SQLAlchemy + PostgreSQL
- Frontend: React + ReactFlow + Vite
- Vector Store: ChromaDB (embedded)
- Embeddings: Gemini Embedding 001 (3072 dims)
